

**Project** 3M London Boilerhouse Steam Boiler Replacement

**Location** London, Ontario, Canada

**Client** 3M Canada

**Gryphon Contact** Dominic Au

---

**Project Summary** Replacement of an existing boiler with a new natural gas / no. 2 fuel oil fired package boiler having a capacity of 80,000 lb/hr in the 3M London boilerhouse.

**Project Services** Gryphon provided the following services:

- Pre-design study to determine the boiler capacity required and project scope definitions.
- Prepared technical specification for the replacement boiler and provided technical coordination.
- Provided detail engineering and technical support for installation of the boiler and associated systems, including building modifications, piping, electrical, and instrumentation and controls.
- Prepared technical specifications and coordination for the civil/structural and mechanical installation work.
